

Carime Bumaruf

A passionate technology student who used to trade assets in banks

+55 11 97414-3200 | carime@gmail.com | [in](#) /carimebumaruf

nice to meet you!

As a physicist and banking trader I learned to combine my analytical knowledge with the understanding of the business and corporate world. Within this select group of professionals I worked with, the feedback I received highly prized my communication, relational, and negotiation skills as well as my ability to work within an environment of emerging technologies and their solutions. Now, I'm striving to succeed in a Computer Science course as a complement to my career shift plan.

education

- Universidade de São Paulo (USP) - São Paulo, Brazil 2017/2021

Database Management SQL ★

work experience

- Standard Chartered Bank - Sales Trader for Global Corporates 2012/2014
I used to sell financial assets and hedge tools to the Brazilian branches of worldwide companies.
Most valuable transferable skills: LOVE by learning new things and "tweakable" communication.
What I really liked about this job: cross-departmental collaborative work and knowledge sharing.
- HSBC Bank Brasil - Fixed Income Trader and Sales Trader for Small Local Companies 2007/2012
Firstly as an intern, then as fixed income trader for Brazilian bonds and finally as foreign exchange sales evangelist.
Skills I acquired I am most proud: high resilience, self-taught and enthusiasm to changes.
