## nice to meet you!

---

I'm intending to become a "Y tech professional", that one with a good balance between soft and hard skills. Better saying, I'm eager to combine my previous business experience as a banking trader with the knowledge I'm building up as a Computer Science student. The feedback I received working in financial markets highly prized my communication and relational skills as well as my ability to work in so different roles - behind the computer or in a client meeting.

## education

---

- Universidade de São Paulo (USP) - São Paulo, Brazil 2017/2021  
Bachelor's Degree in Computer Science
- Fundação Getúlio Vargas (FGV) - São Paulo, Brazil 2015/2016

Bachelor's Degree in Physics

## technical skills

---

- Work Flow  
Git  /carimeb
- Languages  
Programming C, Java, Kotlin ★, ★★★, ★★  
Scripting Python, JavaScript ★★★, ★  
Markup HTML, XML, L<sup>A</sup>T<sub>E</sub>X ★★, ★★, ★★  
Database Management SQL, JSON, Cypher ★★★, ★★, ★★

## work experience

---

- Standard Chartered Bank - Sales Trader for Global Corporates 2012/2014  
I used to sell financial assets and hedge tools to the Brazilian branches of worldwide companies.  
*Most valuable transferable skills: LOVE by learning new things and "tweakable" communication.*  
What I really liked about this job: cross-departmental collaborative work and knowledge sharing.
- HSBC Bank Brasil - Fixed Income Trader and Sales Trader for Small Local Companies 2007/2012  
Firstly as an intern, then as fixed income trader for Brazilian bonds and finally as foreign exchange sales evangelist.  
*Skills I acquired I am most proud: high resilience, self-taught and enthusiasm to changes.*
